

Air Transport Evolution February 2026

February 2026 confirms the upward trend in air transport.

More and more passengers are choosing to travel by air, and traffic continues to grow compared to the same period last year.

In February this year, 362,826 passengers traveled by air – 28.2% more than in February 2025.

Additionally, 2,788 aircraft operations were recorded, an increase of 22.6% compared to last year.

Where did passengers fly most often? Istanbul remains at the top, followed by Sharm El Sheikh, London, Milan, Bucharest, and Paris – destinations that recorded significant increases.
