SUBPART A — General

DS SoC.GEN.001 Scope

These Detailed Specifications (DSs) and the related acceptable means of compliance (AMC) and guidance material (GM) are applicable to the design, or changes to the design, of ATM/ANS equipment for which a statement of compliance (SoC) is to be made in accordance with Chapter 3 of CT - CES ATM/ANS.

The basis for the issue of a SoC should be the DSs that are applicable to the ATM/ANS equipment on or after the date of the issue of the SoC.

AMC1 DS SoC.GEN.001 Scope

In order to issue a SoC, the ATM/ANS providers or the organisations involved in the design or production of ATM/ANS equipment (DPOs), on their behalf, should demonstrate compliance of ATM/ANS equipment with:

- (a) the DS set out in this Subpart A; and
- (b) the additional specific DS set out in Subpart B, if available.

DS SoC.GEN.005 Standards to meet technical conditions

Unless otherwise stated in the DS, the ATM/ANS equipment needs to meet the following:

(a) Environmental standards

The ATM/ANS equipment is to be designed to operate in the environmental conditions for the intended use.

Compliance should be demonstrated with one of the following environmental standards, as applicable:

- (1) ETSI EN 300 019-1-3 (V2.4.1) (2014-04) ‘Environmental Engineering (EE); Environmental conditions and environmental tests for telecommunications equipment; Part 1-3: Classification of environmental conditions; Stationary use at weather protected locations’
- (2) ETSI EN 300 019-1-4 (V2.2.1) (2014-04) ‘Environmental Engineering (EE); Environmental conditions and environmental tests for telecommunications equipment; Part 1-4: Classification of environmental conditions; Stationary use at non-weather protected locations’

(b) Software

Software is to be developed with an assurance level that is commensurate with the intended use. The software assurance level should be determined according to the safety assessment.

(c) Hardware

Hardware is to be suitable for the intended use of the ATM/ANS equipment.

The hardware is to behave as intended and to be commensurate with the safety assessment.
